EDUCATION

Bachelor of Technology , Electronics and Communication Engineering

Bilra Institute of Technology

2020 - Present

EXPERIENCE

Frontend Developer

EPSoft

05/2022 - 07/2022 Jaipur

- Worked on optimised form implementations, various bug fixes and code improvements in production-level software through React.js.
- Worked on redux, styled-components and different form libraries like react hook form and redux-form in React framework with javascript.

Full Stack Developer

Cohyk

08/2022 - 09/2022 Remote

- Building the web platform for Cohyk from scratch. Built the alpha, MVP and finished product - owned the backend, front end, deployments and data pipeline.
- Worked on developing a website that uses a combination of Next JS, Material UI, JavaScript, and Node.js to create a custom theme that was optimized for performance and search engine visibility
- Maintained deployments and AWS servers. Undertook migration from a Mongo DB cluster to a single EC2 instance.

Full Stack Developer

EPSoft

12/2022 - 01/2023 Jaipur

- Led the team of 2 developers to develop a front-end reporting system for a company named WASH-TRAX
- Worked on logical implementation and API integration on the website.
- Built the backend for the WASH-TRAX app. Owned the product & tech for inventory, location polygons, and delivery routes.

Android Developer

Jouls

03/2023 - Present Jaipur

- Worked on creating a Apps frontend and backend from scratch.
- As it was a startup we learned a lot and achieved a lot of things.
- Maintained and managed the data storing through Redux for frontend.
- Designed a platform for Jouls , inventory, price management, and logistics tracking for the B2B.

Server-side

MySQL

NodeJS

Mongoose

AWS

MongoDB

HTTP/2

Express.js

PROJECTS

Medilocker

<https://medilocker.vercel.app/>

Create a project website that helped store data for health doctors' prescriptions and provided a key to access it. The website aimed to improve the efficiency of storing and accessing medical data for doctors and patients.

- It was in React.js and on website we can store doctors prescriptions , details in form of image, pdf and in notes form.

Invoice Generator

<https://ezinvoicegenerator.com/>

- Successfully deployed the application to a production environment, utilizing cloud services such as Amazon Web Services (AWS) and Heroku.

ACHIEVEMENTS

Won 2nd price in pitch primer that was held in IIT Kanpur

The startup idea that we pitched won 2nd price 30k

Went to IIT Delhi for a business meet for our startup

This experience allowed me to not only network with other professionals in the industry but also gain valuable insights into the world of business and entrepreneurship.

HACK-IT SAPIENS

Participating in a 36-hour hackathon was an exhilarating experience that tested my skills and pushed me to new limits.
